||| GOLDTOUCH V2 ADJUSTABLE COMFORT KEYBOARD

The Goldtouch V2 Adjustable Comfort Keyboard is the second generation of our premier computer keyboard. Each is uniquely designed to adjust from 0-30° on the horizontal plane to properly straighten your wrists, and 0-30° of vertical tenting to help alleviate inward turning of the wrists (pronation), pressure on tendons, and align the arms and shoulders in a natural and comfortable position.

Plus, each keyboard adjusts to fit a wide range of body types, not just an average. That means everyone — at home or in the office — can find an ideal comfort position with a single computer keyboard.

Full adjustability allows for 0-30° adjustment on the horizontal and vertical planes to put users in an ideal comfort typing position.

||| FEATURES AND BENEFITS

- **Smart Adjustability:** Adjusts effortlessly through our patented lever-locking design.
- **Soft Key Touch:** Low activation force and full key travel distance increases your comfort and reduces the risk of “bottoming out” when typing.
- **Plug and Play:** No driver or software installation required. Simply plug into any USB port on a PC or Mac.
- **Easy to Use:** Allows users to find their individual comfort without additional accessories or attachments.
- **Global:** Available in 14 languages.
- **Compatibility:** GTU-0088 for MAC/PC (Windows 10, 8, 7, Vista, XP, 2000, Mac OS 10.4 by USB).

GTN-0099 for PC (Windows 10, 8, 7, Vista, XP, 2000 by USB or PS2).

U.S. Patents – Standard Keyboard: 6641316, 6984081
