

GOLDTOUCH EASYLIFT™ DESK

With 40 steps of vertical lift and up to 27 lbs (12kg) of counterforce lift, the EasyLift Desk is the most advanced desktop sit/stand desk solution in the world.

With the Goldtouch EasyLift Desk solution, users can maintain their ideal work posture throughout the day, whether sitting or standing, to prevent common work related pains like lower back pain. The adjustable sliding keyboard tray allows users to keep their elbows close to their side and to maintain the ideal minimal ergonomic distance of an arm's length from their computer screen.

The EasyLift Desk has the ability to raise and lower using sophisticated torque settings. Users can use the adjustment knobs on the sides of the desk to adjust the torque to accommodate the weight on their desks. The desk is then raised or lowered with the help of spring lifts to lighten the load.

The EasyLift keyboard tray lowers, raises, and tilts unlike any other desktop sit/stand desk on the market.

FEATURES AND BENEFITS

- **Powerful:** 27 lbs (12 kg) of elevating lift force. Desk holds up to 66 lbs (30 kg).
